

**DB26 by De Bethune**

Palladium plated white gold or rose gold (44.4 mm) timepiece equipped with a self-winding DB 2005 movement with a five-day power reserve. Hours, minutes, date at 9 o'clock, perpetual calendar, day and month display in apertures, phases of the moon and leap year at 3 o'clock. Blue steel hands, sapphire crystals with double anti-reflective treatment and alligator strap.

**HM2 by MB&F and Sage Vaughn for Only Watch**

18 carat white gold and titanium timepiece equipped with a Jean-Marc Wiederrecht/Agénhor designed movement with Girard-Perregaux oscillator and gear train. Retrograde date, bi-hemisphere moon phase, jumping hours and concentric retrograde minutes. Blackened 18 carat gold barbed wire which imprisons the movement - a symbol of illness capturing the body. Unique piece.

**WT3 TOURBILLON by Wyler Genève**

Black ceramic or 18 carat white gold (42 mm) timepiece equipped with a skeleton, self-winding movement and 72-hour power reserve. Hours, minutes, 60-second tourbillon, titanium or white gold crown, crown protector, four titanium case screws, sapphire crystals, front and back, black rubber strap and deployment buckle. Water resistant to 100 metres

**GRANDCLIFF TNT ROYAL RETRO by Pierre DeRoche**

Black PVD, titanium and steel timepiece fitted with an automatic Dubois Dépraz movement. Hours, minutes, retrograde seconds in six 10-second sectors and date. Decorated and engraved 22 carat gold oscillating weight and crocodile strap. Limited edition of 21 for the rose gold version and 201 pieces for the titanium and steel version.

**CENTIGRAPHE SOUVERAIN by François-Paul Journe**

The hand-wound Calibre 1506 movement measures elapsed times from one hundredth of a second to 10 minutes on three dials, each with a time scale in red and a tachometer scale in black. The tachometer scales convert times into speeds ranging from 6 km/h — walking pace — to 360,000 km/h, well above the escape velocity of a rocket going into low-level orbit. A mechanical chronograph unlike any that has ever been made before. The Centigraphe Souverain received the Geneva Watchmaking Grand Prix 2008.
